

LAST PLANTING DATES FOR SECOND-SEASON CROPS

To calculate the best time to plant your second vegetable crops, look at the first expected freeze dates in the chart below. Choose the date that comes closest to the expected first killing frost in your area. If you do not know the date, call your local county extension agent or go to our Web site at Almanac.com for more frost-date information.

FIRST EXPECTED FREEZE:	SEPTEMBER 10	SEPTEMBER 20	SEPTEMBER 30	OCTOBER 10	OCTOBER 20	OCTOBER 30
VEGETABLE	PLANT BY . . .					
Beets	June 25	July 5	July 15	July 25	August 5	August 20
Broccoli (<i>transplants</i>)	*	June 15	June 25	July 10	July 25	August 10
Bush beans	*	*	June 15	July 1	July 15	July 30
Cabbage (<i>transplants</i>)	*	June 15	June 25	July 10	July 25	August 10
Carrots	June 25	July 5	July 15	July 25	August 5	August 15
Chard	June 25	July 5	July 10	July 20	July 30	August 15
Corn	*	*	June 15	June 25	July 10	July 20
Cucumbers	*	*	June 15	June 30	July 15	August 1
Leaf lettuce	July 20	August 1	August 10	August 20	September 1	September 10
Peas	June 25	July 10	July 20	August 1	August 10	August 20
Peppers (<i>transplants</i>)	*	June 20	June 30	July 7	July 15	July 25
Radishes	August 1	August 15	September 1	September 10	September 20	September 30
